

ROADX

LIFETIME WARRANTY including ACCIDENTAL DAMAGE COVER

If your Roadx tyre develops a fault, including accidental damage during normal driving, **V&M Tyres** will fit a new Roadx tyre, charging only for the tread used, wheel balancing and new valves.

HOW IT WORKS

This warranty applies to Roadx tyres and will be honoured at V&M Tyres for the period of ownership by the original purchaser or when the tyres reach a tread depth of 2mm.

You will be charged only for the tread used but the warranty contribution must be used against the purchase of a new Roadx car tyre.

All claims must be accompanied by an invoice and the fully completed original warranty certificate issued at the time of purchase, the tyre having been balanced and a new valve fitted where necessary by an authorised Roadx dealership.

The remaining tread depth of the tyre will be judged from taking an average of three tread depth readings around the centre of the tyre, none of which must be below 2mm.

Tyres with a suspected manufacturing fault or tyres irreparably damaged will be replaced at the rates on the remaining tread depth chart, below.

What's not covered

The tyre must have been used for normal road use. Off road use, racing, deliberate or malicious damage will invalidate the warranty. This warranty does not cover tyres used on taxis, cabs or vehicles used for that purpose.

The warranty is limited to cars and car derived vans and expressly excludes vans, pickups and car derived campers.

Runflat tyres are not included under this scheme

The warranty applies to the original purchaser and is not transferable. This warranty does not cover rapid or uneven wear caused by vehicle defects. This warranty is invalid if the tyre is removed or repaired by any other company or individual.

Refitting, rebalancing and new valves are chargeable.

This warranty is valid provided there is a minimum tread depth of 2mm on the tyre.

Tread Depth Chart

REMAINING TREAD DEPTH	7mm	6mm	5mm	4mm	3mm	2mm	1.6mm
PERCENTAGE	100%	80%	60%	40%	25%	5%	nil
NB. THE MINIMUM LEGAL TREAD DEPTH IS 1.6mm
